

Build a City

What do you see in a city? Skyscrapers, cars, stores, schools, playgrounds, etc... Use whatever you can find around the house as building materials: old file folders, cardboard, TP tubes, recycled plastic, markers, colored paper, glue, tape, and anything else you can think of. Rings and triangles of paper can help the creations stand on their own. Make it as big or as small as you like – you can always add new elements to your city!
